## HARDWARE

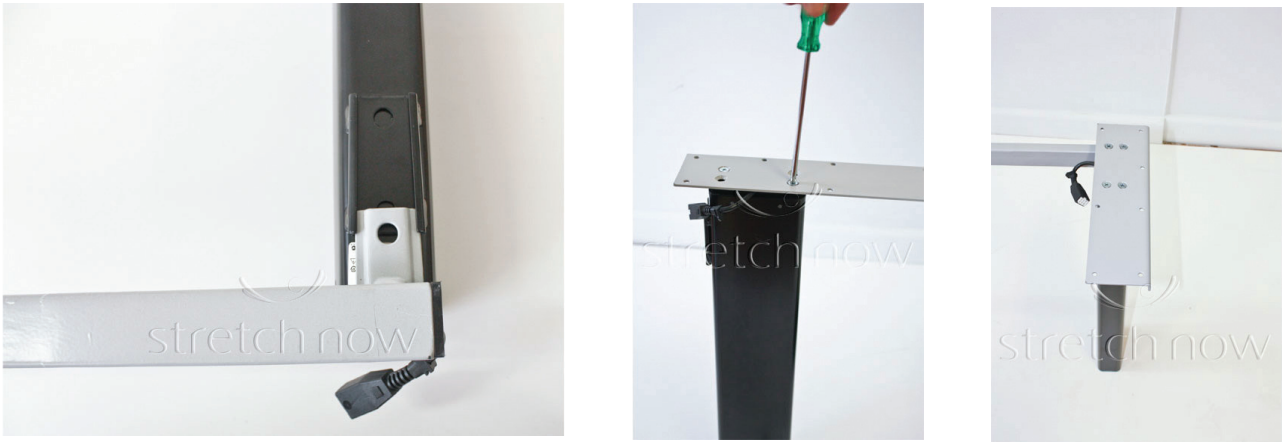

Item No	Qty	Item Name
1	1	Cross bar
2	2	Feet
3	2	Desktop bracket
4	8	Foot to leg attachment
5	8	Desktop Bracket to leg bolts
6	4	Levellers
7	16	Screws for desktop bracket (3) and control box (13) (not showing)

Item No	Qty	Item Name
8	2	Height adjustable legs
9	1	Up down switch
10	1	Bracket for up down switch
11	2	Connect cord leg to control box
12	1	Power lead
13	1	Control box
14	2	Screws to attach up down switch bracket (10) (not showing)

# INSTALLATION

## Attaching the leg to the cross bar

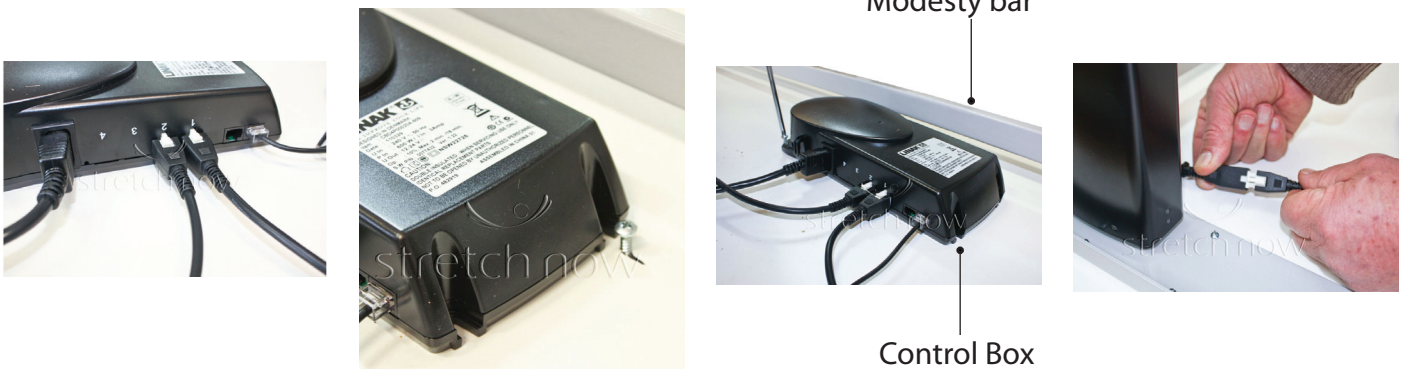

1. Slot the cross bar ① into the leg grooves ⑧
2. Screw ⑤ the desktop bracket ③ to the leg. Ensure that the connector cable is in the slot and is not trapped between the desktop bracket and the leg.
3. Lie the desktop upside down on the floor. Be sure to avoid scratching the surface.

## Attaching the leg assembly to the desktop

4. Place the leg assembly on to the underside of the desktop.
5. Position the brackets ③ so you have 300 mm (from front of desktop) and 200 mm (from the back of the desktop). Assuming you have 800 mm depth desktop.
6. Centre assembly in the length of the desktop.
7. Mark the holes on the underside of the desk with a marker.
8. Drill hole on the marks no deeper than 15 mm.
9. Screw ⑦ the desktop bracket to the underside of the desktop.

## Attaching the control box to the desktop

10. Plug in one end of a connect cord ⑪ to socket no. 1 and one end of another connect cord to socket no. 2 of the control box ⑬.
11. Screw ⑦ the control box ⑬ to the underside of the desktop. See picture above.
12. Plug in the other end of each connect cord to the socket on the legs.

## Attaching the up down switch to the desktop

13. Slot in the switch bracket ⑩ to the switch ⑨.
14. Position the switch as illustrated on the picture above.
15. Screw ⑭ the switch bracket in position.

## Attaching the feet to the legs

16. Screw the levellers ⑥ to the feet ②.
17. Screw ④ the feet ② on to each leg.
18. Turn the desk over. Plug in power lead. It is ready to use.

## TROUBLESHOOTING

If for any reason your desk does not operate as expected, please try the following in order ie if 1 doesn't resolve the issue move on to no 2 etc.

1. Unplug and re plug all of the connections to ensure they are fully connected.
2. Press the down button on the up down switch and hold for 6-8 secs.
3. Unplug the legs leaving only one leg in channel 1, (other channels are not connected) try to operate this leg with the up down switch.
4. Unplug the first leg and plug the second leg into channel 1 , (other channels are not connected) try to operate this leg with the up down switch.
5. Reconnect all legs, press the down button on the up down switch and hold for 6-8 secs.
6. Contact us.
